

Guarantee access security and compliance by protecting your data ...

Cyber crime has exploded by + 238% in 2020 (Modern Bank Heist Report)

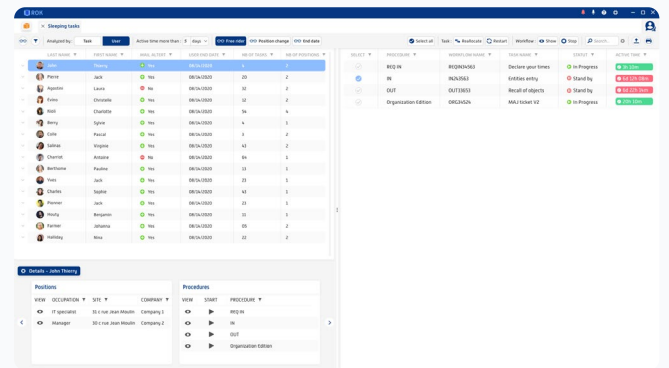

Shadow IT: Identity management compliant with your organization

Identity and Access Management (IAM) is the discipline that enables the right people to access the right resources at the right time for the right reasons. (Gartner)

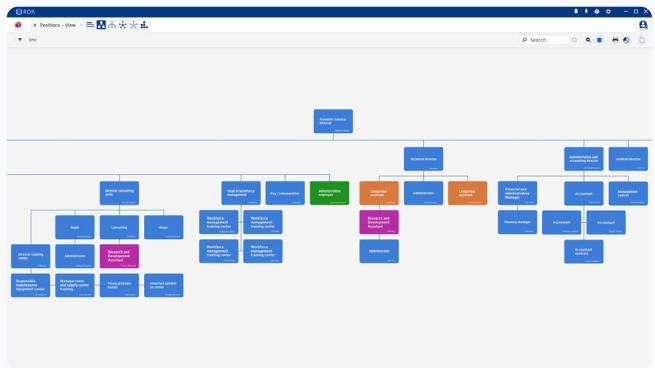

ROK enables access and identity management as defined by the organization chart and responsibilities, in integrity with your HR applications and other IT systems.

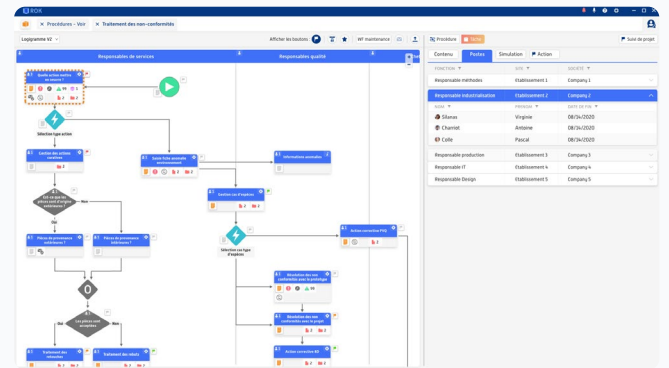

Control the entry / exit and mobility of employees (identity life cycle)

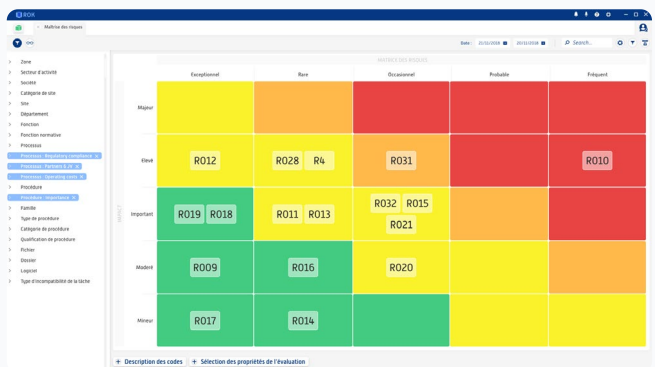

Map profiles and responsibilities of identities

Deploy applications in No Code avoiding by design any risk of Shadow IT

Map your risks and manage Segregation of Duties (SoD)

Control access to all your applications including your other pre-existing Low Code / No Code applications
