NEW PARTNERSHIP

We have reimagined the way you build and publish your apps and are introducing two key innovations:
- An AI-assisted no-code designer to speed up app creation,
- And a responsive web application for your end users.

Discover how these features transform your experience!

AN AI-ASSISTED NO-CODE APPLICATION – ENRICH AND AUTOMATE THE CREATION OF YOUR APPS.

Create applications in just a few minutes with the generative AI-assisted no-code designer. Let the AI handle most of the work, while keeping the option to complete and customize if needed.

✓ Automated creation
Launch an application with a simple request like "Can you create an onboarding app?". The AI generates the flows, assigns roles, and integrates the necessary documents and software for a complete workflow.

✓ Customized user interfaces
The AI designs interfaces and forms tailored to your needs, while respecting your design system for a consistent experience.

✓ Automatic documentation and reports
The AI generates documentation and reports in real time, including task descriptions, processes, risks, and KPIs.

✓ Workflow rule management
The AI automatically configures workflow steps and integrates tools such as OCR, QR Code, and Web Services for ready-to-use applications.
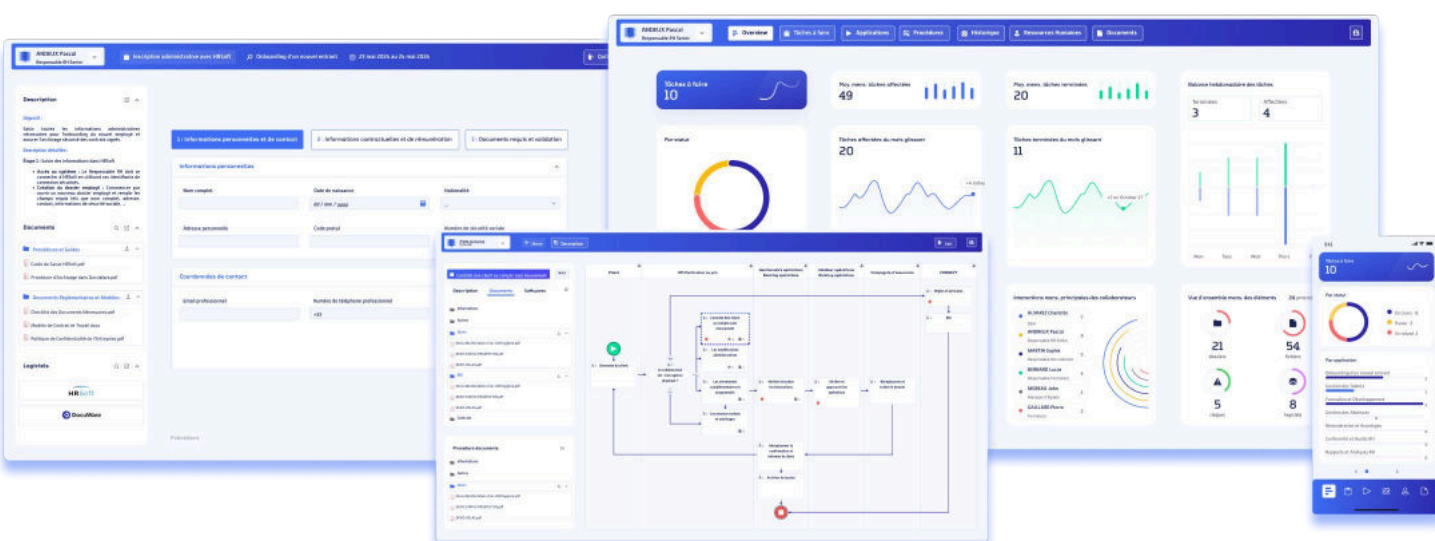

✓ Time savings and efficiency
Repetitive processes are automated, allowing you to focus on higher value-added tasks.

✓ Total flexibility
Switch between AI automation and manual no-code customization to fine-tune every detail according to your needs.

THE ROK WEB APPLICATION – ATAWADAC

Give your end users a smooth interface, accessible anytime, anywhere, on any device (PC, Mac, smartphone), providing them with everything they need to work.

✓ Instant access to your apps
Launch all your business applications in just a few clicks, track workflow progress, and get notified as soon as a new task is assigned to you.

✓ Real-time dashboard access
Monitor task status in real time and manage your workload accordingly.

✓ Visualize your ecosystem
View org charts, roles, and responsibilities of the people you collaborate with.

✓ KPIs and real-time reports
Access key performance indicators through automatically generated reports and maps.

✓ Multi-device accessibility
Access the platform on any device, fully customized to your design system.

✓ Intuitive input screens
Submit, request, or process information easily through clear interfaces.

✓ Business process tracking
Control workflow progress and information validity in real time.

✓ Procedure visualization
Get a detailed view of flowcharts and procedures to know who does what and how.

✓ Detailed activity history
Consult the complete history of actions and tasks for transparent tracking.

✓ One-click access to your EDM
Manage the full lifecycle of your documents (automatic alerts, etc.).

inforca ROK SOLUTION PARTNERS WITH INFORCA TO ACCELERATE DIGITAL TRANSFORMATION!

We are pleased to announce our strategic partnership with Inforca, a recognized digital agency and member of Numeum and CRiP. Together, we are offering a no-code solution enhanced by generative AI to simplify and speed up the digitalization of business processes.

Thanks to this partnership, Inforca benefits from our innovative and secure platform, enabling their clients to create applications without programming skills, while boosting productivity through intelligent automation.

Inforca and ROK Solution are committed to delivering high-performance, reliable digital solutions to support companies in their digital transformation.
